

Make your own tournament *Fantasy Chess*[®] board.

32" wide chess board with 4" squares is used for official play of *Fantasy Chess*. This board is used with the 1" block base *Fantasy Chess* pieces in order to accommodate 6 piece combat in a square.

Make your boards out of paper, fabric, vinyl, leather, masonite, plywood or whatever you are comfortable with. Paint, ink or print-out your squares. Make sure that you trim to the exact edge so that when you play the 4 Player Expansion game, you can bump your two chess sets together.
